AV. Recursos Hidraulicos 224  
Can Pablo de las Salinas, C.P. 54935  
Tultitlan, Edo. de Mexico

Dear Ing. Guillermo,

We have reviewed the fluid properties and the 35VQ25 test results on HIDRALUB Oil ISO VG32. A blend of 0.60% wt. HiTEC 523 and 0.010% wt. PC1844 in 42.74% wt. PEMEX 250N and 56.65% wt. PEMEX 100N API GI base stock.

It is our opinion that HIDRALUB Oil ISO VG32, meets the anti-wear requirements of the hydraulic fluid recommendations for Eaton Vickers products according to Brochure 03-401-2010.

Sincerely

Thelma Marougy  
Lubricant Specialist  
Eaton Hydraulic Operation
